

SYNC MY MAP! App to Desktop

Sync App

This HelpSheet assumes that you have already created maps on your App and would like to sync them to the computer.

1. Touch Back Paddock Mobile icon on your device (or touch Burger menu  and Back To Home from within App)
2. Touch CornerPost on home screen
3. Ensure file status is Ready, if so continue, if not wait five minutes and try again
4. Touch file to Tick
5. Touch Done

This will now send your new data including maps to CornerPost, which will usually take 2-5 minutes to process. It's now time to move to your computer.

Retrieving on your Desktop

First things first, we need to open the correct client file on your computer.

Auto-Sync. Off

Drag a column header here to group by that column.

	FILE NAME	CORNERPOST STATUS	CORNERPOST LAST MODIFIED	LOCAL FILE LAST MODIFIED	LAST SYNC. TIME	SYNC. STATUS
<div></div>	BPCAusFarming	Ready	Tuesday 6 Jun 2017 06:35:20	Thursday 11 May 2017 13:23:26	Thursday 11 May 2017 13:26:09	Update Available on CornerPost
<div></div>	BPCAusHolding	Ready	Thursday 8 Jun 2017 02:14:10	Thursday 11 May 2017 13:33:22	Thursday 11 May 2017 13:27:51	Update Available on CornerPost and Local Changes
<div></div>	BPCDemonstration	Ready	Tuesday 9 May 2017 09:11:21			No Local Copy

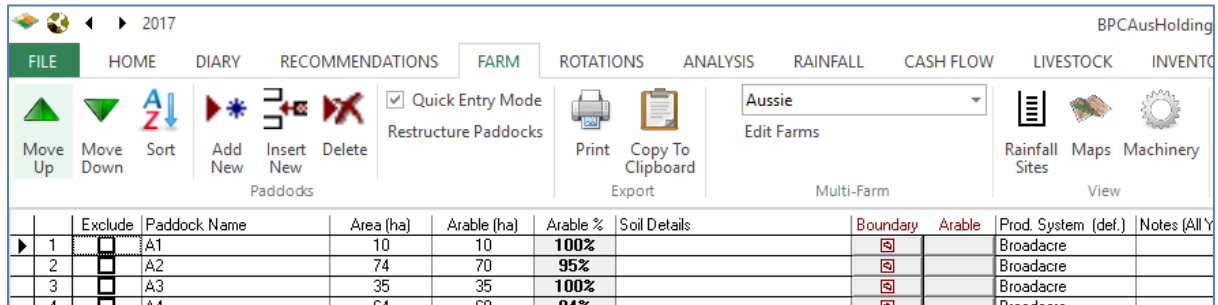

Back Paddock Adviser 10 Professional

1. Double click on the Adviser icon on your desktop
2. Click Refresh File List, ensure status on your file is Ready. If not, wait 5 minutes and Refresh again

3. Single click your file to highlight
4. Click Sync Selected Files with CornerPost
5. Click OK on Manual Sync Complete

Your latest data has been synchronised. Please continue to open the file, set coordinates and sync again.

Open File, Set Co-ordinate System

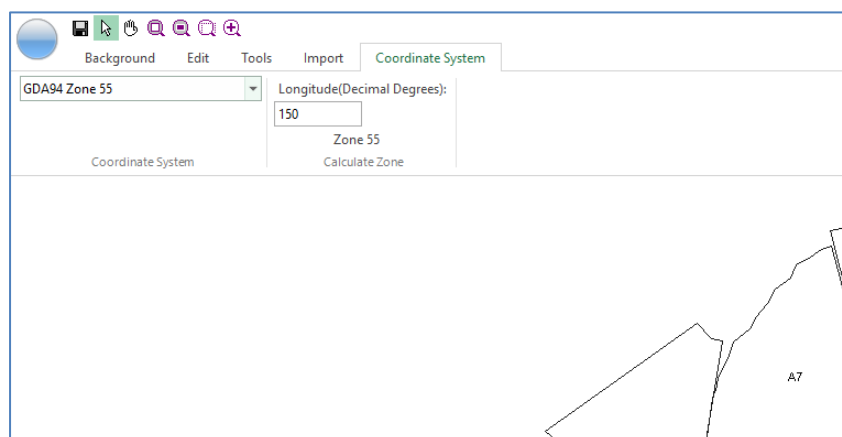

The screenshot shows the BPC AusHolding software interface. The 'FARM' tab is selected. Below the menu bar, there are icons for 'Move Up', 'Move Down', 'Sort', 'Add New', 'Insert New', and 'Delete Paddocks'. A 'Quick Entry Mode' checkbox is checked. To the right, there are icons for 'Print', 'Copy To Clipboard', and 'Export'. A dropdown menu shows 'Aussie' and 'Edit Farms'. Further right are icons for 'Rainfall Sites', 'Maps', and 'Machinery'. At the bottom, a table lists paddocks with columns for 'Exclude', 'Paddock Name', 'Area (ha)', 'Arable (ha)', 'Arable %', 'Soil Details', 'Boundary', 'Arable', 'Prod. System (def.)', and 'Notes (All Y'.

	Exclude	Paddock Name	Area (ha)	Arable (ha)	Arable %	Soil Details	Boundary	Arable	Prod. System (def.)	Notes (All Y
1	<input type="checkbox"/>	A1	10	10	100%		<input checked="" type="checkbox"/>		Broadacre	
2	<input type="checkbox"/>	A2	74	70	95%		<input checked="" type="checkbox"/>		Broadacre	
3	<input type="checkbox"/>	A3	35	35	100%		<input checked="" type="checkbox"/>		Broadacre	
4	<input type="checkbox"/>	A4	64	60	94%		<input checked="" type="checkbox"/>		Broadacre	

The map you have created on your App has synchronised with your file, we need to open the file, set the co-ordinates and sync again.

6. Double click client file to open
7. Click Farm tab
8. Click on Maps
9. Click on the bar beneath Boundary column (any paddock)
10. Check paddocks are correct / as expected

You should now be able to see your Map on the screen with Paddock Names assigned, keep going, it's not ready yet!

11. Click on Coordinate System tab

The default coordinate system on your Map may be "Unknown Projected System" or it could be "WGS84". This needs to be changed as per following.

12. Enter the Longitude of your Farm in Decimal Degrees, you can find this in the bottom toolbar of the mapping pop-up (eg. 150)
13. Click Enter on keyboard

The Zone will appear beneath your entered Longitude

14. Use the drop down box (System Details) to select your correct Zone
15. Click OK at prompt to confirm new zone
16. Click Save disc
17. Close Mapping box
18. Repeat steps 9-17 for any additional Farms

You have now successfully imported your Map from your Mobile App!

Quick Check in Mapping

Let's double check!

1. Click on Mapping tab
2. Click on Show Paddocks
3. Click on Show Paddock Names

Do we have success?

Yes – Congratulations!

No – Try closing your client file and re-opening it. Sometimes it needs a little refresher. If this is still a No, double check your processes and contact the Help Desk for further assistance.

Don't forget to go to our website to check out more Handy Hints and to explore new possibilities in both your App and your Adviser program!
