

# Rotations

## Area Summary

The Area Summary table displays a tally of total area for different crop types, varieties and categories per year. This is handy for planning the balance of production or calculating the percentages required for the spread of Cereal, Broadleaf and Pasture.

1. The Area Summary View can be manipulated to show various views. Tick boxes on and off to change the display for:
  1. Varieties,
  2. Subtotals and,
  3. Percentages.
  
2. Total Area Sown – bolded total at the very bottom of the table (→).
  
3. Print the Table – either to printer or pdf.
  
4. Copy Table to spread sheet or word program to modify further.

AREA SUMMARY (ha) - Home Farm

# Rotation Summary

## 1. Rotation View

The Rotations View provides an alternative data presentation to the Management View as it can multiple year view of crop types / variety data at one time.

### 1. Crop variety.

1. To see variety>Click on the Year title of each column.

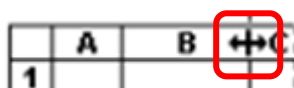

Rotations (Shaded cell indicates seed blend)						
Paddock	2010		2011		2012	
	Crop	Variety	Crop	Variety	Crop	Variety
A 01 (139.0)	Subclover	Gosse PBR S/S	Phalaris	Maru	Wheat APH	EGA Wedgetail (PH)
A 02 (133.0)	Pea	Kaspa Dun/EPR	Pigeon Grass	Purple Pigeon	Barley feed	Hindmarsh (Feed/PB)
A 03 (80.0)	Pea	Kaspa Dun/EPR	Pigeon Grass	Purple Pigeon	Wheat APH	EGA Wedgetail (PH)

2. To remove variety>Click on the year title of each column.

Rotations (Shaded cell indicates seed blend)				
Paddock	2010		2011	2012
	Crop	Variety	Crop	Crop
A 01 (139.0)	Subclover	Gosse PBR S/S	Phalaris	Wheat APH
A 02 (133.0)	Pea	Kaspa Dun/EPR	Pigeon Grass	Barley feed
A 03 (80.0)	Pea	Kaspa Dun/EPR	Pigeon Grass	Wheat APH

### 2. To expand columns view.

1. Move mouse pointer to column vertical line between the Years at the top of each column.
2. Mouse pointer changes into a symbol with a vertical line and two horizontal arrows.

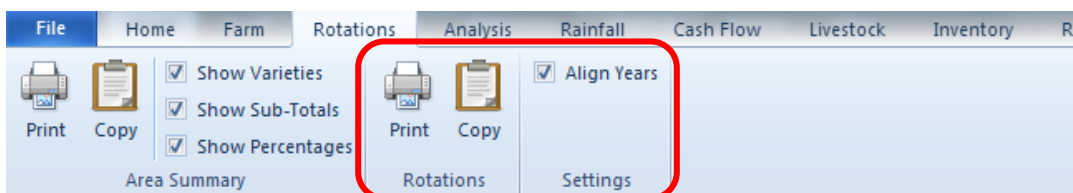

3. Hold right Mouse button down>Drag to desired width>let go mouse button. Column will expand or contract as desired.

### 3. Print the Table – either to printer or pdf.

### 4. Copy Table to spread sheet or word program to modify further.

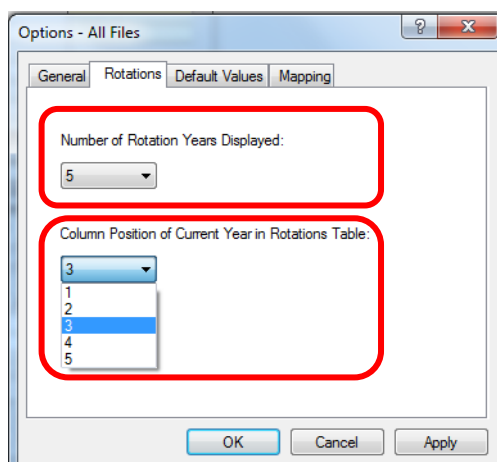

### 5. Align Years – Ticked by default. Allows for columns to be wider.

### 6. Setting number of years viewed in Rotation Summary.

1. Click File Tab>Options>Rotations Tab.
2. Click on the drop down box to select Number of Years Displayed.

- Click on the drop down box to select Column Position of Current Year in Rotations Table.
- Click Apply button.

## 2. Create Plan in Rotation Summary

Using this feature creates a rotation summary plan for future or past years in a quick way.

- Click on Year Crop Title at top of an empty column. This will reveal the Variety column for that year.
- Click in first cell underneath Year Crop>Click on Drop down list – either scroll or type first few letters of Crop type. For example ‘Wh’ for Wheat>Click on desired Crop Type in drop down list.

Rotations (Shaded cell indicates seed blend)					
Paddock	2011 Crop	2012 Crop	2012 Variety	2013 Crop	2013 Variety
A 01 (139.0)	Canola CL	Wheat APH	EGA Wedgetail (PH)	Canola CL	45Y77 CL BL MR
A 02 (133.0)	Wheat APH	Wheat APH	EGA Wedgetail (PH)	Wheat AH	Ventura (AH//EPR)

Mallee (114.0)	Wheat APH	Barley feed	Hindmarsh (Feed/PB)	Wheat APW	
One Tree (185.0)	Barley feed	Lupin (angust)	Quilnock EPR	Wheat APwN	
Outside Pvt 1 (115.0)	Lucerne Dry	Lucerne Dry	Genises	Wheat ASFT	
Pine Tree (110.0)	Canola CL	Lucerne Dry	Genises	Wheat ASW	
Pivot 1 (79.0)	Lucerne Dry	Lucerne Irrigation	54Q53	Wheat ASWN	
Quandong (277.0)	Lucerne Dry	Lucerne Dry	Genises		

- Repeat for Variety. Repeat for each paddock till complete.  
**Note:** must have chosen a Crop Type prior to choosing a Variety.
- In Home Tab>This method populates only the Crop Type and Variety of each paddock with nothing else defaulting from the Master Database.
