ProSoils - Grain

Management of soils and plant nutrition

The course is suited to agronomists (Resellers and Independent Consultants) and Farm Managers in the grain industry seeking excellence in management of soils and plant nutrition, rather than basic sales agronomy training traditionally offered.

Leading independent specialists:

- Dr Chris Dowling (broadacre soils and plant nutrition) from **Back Paddock**
- Christian Bannan, Soil Physicist from **SE Soil & Water**

Well-suited to:

- Advisory businesses wishing to excel in soils and plant nutrition
 - »» Improve nutrient use efficiency/yields/profitability
 - »» Improve/sustain soil health
- Soils/nutrition focus in managing spatial variability/precision ag
- New starters or experienced advisers

AgSkilled™: ProSoils - Grain—Management of soils and plant nutrition

Course content

Access best-quality soils/plant nutrition technical information online, at a level suited to the experience of the individual.

The CORE content in each module meets training requirements for Fertcare Accredited Adviser (FAA) and is suited to either inexperienced advisers or as a basic refresher for the more experienced. More advanced knowledge is available as an option in each module. Online modules cover all major, minor and trace elements for plant growth as well as management of soil physical properties and soil amelioration.

Locations and timing

8 courses in key centres throughout NSW grain industry:

- Temora Tuesday 10th April 2018
- Trangie Wednesday 11th, and Thursday 12th April 2018
- Moree 8th May, 2018
- Milguy (via Moree), 9th May, 2018
- Tamworth 10th May, 2018
- Yanco 15th May, 2018
- Finley, 16th May, 2018

'Blended' delivery consisting of:

- One-day face-to-face soil pit workshop
- 14 online modules (estimated 10-20 hours)
- Three webinars
- Individual mentoring/tuition

Assessment

Assessment is conducted via online quiz and written case studies that are uploaded; conducted throughout the course.

Costs

This nationally accredited training is delivered in partnership with Tocal College and funded through the AgSkilled™ program funded by NSW Government, with industry partners the Grains Research and Development Corporation (GRDC) and Cotton Australia. **No course fees for eligible applicants from NSW.** The option to pursue FAA (Fertcare Accredited Adviser) invokes fees to Fertiliser Australia of \$217.80 + GST (reduces to \$147.80 + GST for Australian Fertiliser Services Association or Fertiliser Australia members).

Accredited training

The course is aligned and delivered against vocational education and training requirements. Successful completion of assessment tasks will result in achieving a Statement of Attainment and can contribute to a nationally-recognised qualification

Unit of Competency

AHCWRK301 - Collect samples for a rural production or horticulture monitoring program
AHCPCM402 - Develop a soil health and plant nutrition program
AHCPCM505 - Conduct environment and food safety risk assessment of plant nutrition and soil fertility program

How to apply

Numbers are limited and registrations are essential.

You need to register your interest to secure a place in a course running in your region.
